**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7 and 13-18, drawn to a winding support structure and a method of forming it, classified in class 310, subclass 260.
  - II. Claims 8-12 and 19-23, drawn to a winding support structure and a method of forming it, classified in class 310, subclass 260.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I does not require the non-magnetic boards of invention II, and invention II does not require the ties of invention I. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Raymond Y. Mah on March 8, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
